Art Unit: 3744

### **DETAILED ACTION**

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Drawings***

The formal drawings filed with this application have been approved by the Official Draftsman.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3744

Claims 17 - 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liversidge et al (US Patent No. 5,145,684) which teaches the concept of a particle having a size of less than 400nm which is within the range of 10nm to 100u. The preamble to claim 17 has not been given any patentable weight. The limitations set forth in claims 18 - 22 are considered a matter of design choice easily computer simulated by a skill artisan at his/her work station.

*Allowable Subject Matter*

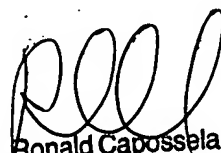

Claims 1 - 16 stand allowed.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Ronald C. Capossela whose telephone number is (703) 308-0688.
